	Paper plates are useful for displaying lots of different entries
Section A	<p>Where necessary vegetables should be carefully washed to removed soil but in no circumstances should oils or similar be applied in an attempt to enhance their appearance.</p> <p>Wash with a soft cloth and plenty of water, brushing will damage the skin and spoil the appearance of the exhibit. Retain the natural bloom wherever possible.</p> <p>Vegetables should be staged as attractively as possible.</p> <p>Slugs are a gardener's nightmare – try crushing eggshells and scatter then around vulnerable young plants and seedlings</p> <p>When Cherry Tomatoes start to form, nip off the end of the flowering truss to encourage bigger fruits</p>
Section B	Compost heaps are reported to be excellent sites for growing marrows.
Section C	<p>Paper plates are useful for displaying fruit entries.</p> <p>Apples should be staged with the eye uppermost; stalk end downwards do not cut the stalks.</p> <p>Plums and similar shaped fruits are best laid out in lines across the plate. It is important that the bloom is not disturbed, and the stalks are intact.</p>
Section D	<p>Florist foam/Oasis allowed.</p> <p>Floral Art a novice is a person who has not previously won a "First" in Floral Art class 29, 30 or 31</p> <p>For more information, please go to www.brinkworthflowershow.com Helpful Hints/Floral Art & Flowers</p>
Section E	<p>The ideal time to cut flowers for showing is in the evening before the show.</p> <p>Flowers should be cut with as much stem as possible making a slanting cut to assist the uptake of water.</p>

	<p>Sometimes flowers such as chrysanthemums and penstemons may not absorb water easily and the stems can be slip upwards (approx. 75mm) under water to assist.</p> <p>After cutting, remove sideshoots, unwanted buds and lower leaves place the flowers upright in a container of clean deep water. It is better for this to be done overnight if possible, and then the container of flowers should be placed in a cool dark room until the show the next day.</p> <p>Many exhibitors carry their exhibits in vases in “milk crates”, making sure that packing prevents excessive movement on the journey.</p> <p>Don’t forget to bring water and vases to stage your flowers on the day. Stage each vase carefully, ensuring that the stem is neither too long nor too short and that damaged leaves are removed. (If you are a novice have a sneaky look at how other more experienced entrants have stages theirs to work out the best length and which way to face the blooms).</p> <p>For pot plants “all round effect” is important. While growing turn your plants every few days particularly just before the show. If necessary, flowers and leaves should be gently “teased” out so that the plant is displayed at its best.</p> <p>Class 44 - 3 Dahlia cactus/semi cactus blooms of any one variety https://www.dahlia-nds.co.uk/about-dahlias/classification/ (Group 8 & Group 9)</p> <p>Class 45 - 3 Pompon Dahlia blooms – must not exceed 55 mm in diameter https://www.dahlia-nds.co.uk/about-dahlias/classification/ (Group 7)</p> <p>Class 46 - 3 Decorative Dahlia blooms https://www.dahlia-nds.co.uk/about-dahlias/classification/ (Group 5)</p> <p>For more information, please go to www.brinkworthflowershow.com Helpful Hints/Floral Art & Flowers</p>

Section K	<p>Knitting and Crochet to be new not washed or worn.</p> <p>Cross Stitch or Embroidery can be framed or unframed.</p> <p>A Limerick is a five-line poem with a specific <u>rhyme</u> scheme and <u>rhythm</u>. It is known for being humorous, nonsensical, or even slightly bawdy. The <u>rhyme scheme</u> is AABBA – meaning the first, second, and fifth lines rhyme with each other, and the third and fourth lines rhyme with each other. The rhythm is also important, creating a bouncy, memorable feel.</p>
